Open-Source Role Hierarchy

Role: Junior Template Maintainer

Tasks:
- Learn Freechising's principles and participate in developer training sessions
- Familiarize with basic open-source web product templates
- Perform minor updates to existing templates and fix simple bugs
- Collaborate with senior developers on Git repositories

Growth Integration: Access foundational templates to support franchisees' online needs

Role: Collaborative Developer

Tasks:
- Create and refine collaborative design libraries
- Develop new features for CRM templates
- Lead code reviews and contribute to documentation
- Share expertise via Freechising's knowledge-sharing platform

Growth Integration: Innovate solutions for adaptability and scalability

Role: Regional Template Coordinator

Tasks:
- Coordinate regional developers
- Host workshops for technical proficiency
- Mange regional repositories
- Test and deploy regional adaptations

Growth Integration: Provide localized templates for operational efficiency

Role: National Technical Lead

Tasks:
- Plan template updates for national needs
- Collaborate with web agencies
- Lead initiatives for analytics tool development
- Standardize template branding and functionality

Growth Integration: Scale frameworks for larger networks

Role: Global Open-Source Advocate

Tasks:
- Promote open-source model and engage globally
- Drive development of cutting-edge features
- Establish partnerships for resource sharing
- Advocate for transparency in framework evolution

Growth Integration: Expand open-source ethos globally

Roles and Responsibilities in Template Development

The Junior Template Maintainer focuses on learning principles and performing minor updates, while the Collaborative Developer creates design libraries and leads code reviews. The Regional Template Coordinator manages regional developers and adaptations, the National Technical Lead plans national template updates, and the Global Open-Source Advocate promotes the open-source model globally, driving feature development and resource sharing.

Open-Source Role Hierarchy

Diagram information

This diagram illustrates the hierarchical structure and roles within an organization focused on open-source advocacy and development. It starts with the Global Open-Source Advocate at the top, who promotes open-source models globally and drives feature development. Below are sequential roles including National Technical Lead, Regional Template Coordinator, Collaborative Developer, and Junior Template Maintainer, each with specific tasks and growth integration responsibilities that contribute to the overall mission of expanding open-source ethos.

Open-Source Role Hierarchy SOP

1. Begin with the Global Open-Source Advocate role.
    1.1. Promote the open-source model globally.
    1.2. Drive development of cutting-edge features.
    1.3. Establish partnerships for resource sharing.
    1.4. Advocate for transparency in framework evolution.
    1.5. Expand open-source ethos globally.
2. Proceed to the National Technical Lead role.
    2.1. Plan template updates for national needs.
    2.2. Collaborate with web agencies.
    2.3. Lead initiatives for analytics tool development.
    2.4. Standardize template branding and functionality.
    2.5. Scale frameworks for larger networks.
3. Move to the Regional Template Coordinator role.
    3.1. Coordinate regional developers.
    3.2. Host workshops for technical proficiency.
    3.3. Manage regional repositories.
    3.4. Test and deploy regional adaptations.
    3.5. Provide localized templates for operational efficiency.
4. Transition to the Collaborative Developer role.
    4.1. Create and refine collaborative design libraries.
    4.2. Develop new features for CRM templates.
    4.3. Lead code reviews and contribute to documentation.
    4.4. Share expertise via Freechising's knowledge-sharing platform.
    4.5. Innovate solutions for adaptability and scalability.
5. Conclude with the Junior Template Maintainer role.
    5.1. Learn Freechising's principles and participate in developer training sessions.
    5.2. Familiarize with basic open-source web product templates.
    5.3. Perform minor updates to existing templates and fix simple bugs.
    5.4. Collaborate with senior developers on Git repositories.
    5.5. Access foundational templates to support franchisees' online needs.
